

SESSION 4 - SELECT Statement Basics

Task 1: Create a table named MusicPlaylist with columns: id, song_name, artist, genre, and duration. Insert at least 5 records representing songs from your favorite Spotify playlist, then write a SELECT statement to retrieve all columns for all songs.

Query / Answer:

```
CREATE TABLE MusicPlaylist(
```

```
    id int AUTO_INCREMENT PRIMARY KEY ,  
    SONG_NAME varchar(50) not null ,  
    artist_name varchar(50) not null ,  
    genre varchar(50) not null ,  
    DURATION INT
```

```
);
```

```
INSERT into MusicPlaylist(SONG_NAME , artist_name , genre , DURATION) VALUES  
("Rabata" , "Gulsan" , "sufi" , 220);
```

```
INSERT into MusicPlaylist(SONG_NAME , artist_name , genre , DURATION) VALUES  
("la la la " , "Taylor Swift" , "pop" , 120);
```

```
INSERT into MusicPlaylist(SONG_NAME , artist_name , genre , DURATION) VALUES  
("tum tak " , "atif" , "love" , 320);
```

```
INSERT into MusicPlaylist(SONG_NAME , artist_name , genre , DURATION) VALUES  
("tara ram pam" , "sunidhi" , "hip hop" , 220);
```

```
INSERT into MusicPlaylist(SONG_NAME , artist_name , genre , DURATION) VALUES  
("Rabata" , "Gulsan" , "sufi" , 220);
```

```
INSERT into MusicPlaylist(SONG_NAME , artist_name , genre , DURATION) VALUES  
("love to death" , "Iana del re" , "melody" ,220);
```

```
SELECT * from MusicPlaylist
```

SESSION 4 - SELECT Statement Basics

Extra options

					id	SONG_NAME	artist_name	genre	DURATION
☐	 Edit	 Copy	 Delete		1	Rabata	Gulsan	sufi	220
☐	 Edit	 Copy	 Delete		2	la la la	Taylor Swift	pop	120
☐	 Edit	 Copy	 Delete		3	tum tak	atif	love	320
☐	 Edit	 Copy	 Delete		4	tara ram pam	sunidhi	hip hop	220
☐	 Edit	 Copy	 Delete		5	Rabata	Gulsan	sufi	220
☐	 Edit	 Copy	 Delete		6	love to death	lana del re	melody	220

 ☐ Check all With selected:  Edit  Copy  Delete  Export

SESSION 4 - SELECT Statement Basics

Task 2: Write a SQL query to display only the song_name and artist columns from the MusicPlaylist table, showing just the first 3 records using the LIMIT keyword.

Query / Answer:

```
SELECT SONG_NAME , artist_name FROM MusicPlaylist LIMIT 3
```

Image / Screenshot:

The screenshot shows a web-based SQL interface. At the top, there's a 'Show query box' button. Below it, a green status bar indicates 'Showing rows 0 - 2 (3 total, Query took 0.0003 seconds.)'. The SQL query is displayed in a text area: `SELECT SONG_NAME , artist_name FROM MusicPlaylist LIMIT 3;`. Below the query, there are several interactive links: 'Profiling', 'Edit inline', 'Edit', 'Explain SQL', 'Create PHP code', and 'Refresh'. An 'Extra options' button is also present. The results are displayed in a table with two columns: 'SONG_NAME' and 'artist_name'. Each row has a checkbox, an 'Edit' button, a 'Copy' button, and a 'Delete' button. The data rows are: 'Rabata' by 'Gulsan', 'la la la' by 'Tailor Swift', and 'tum tak' by 'atif'.

	SONG_NAME	artist_name
☐	Rabata	Gulsan
☐	la la la	Tailor Swift
☐	tum tak	atif

SESSION 4 - SELECT Statement Basics

Task 3: Suppose you have a table named FoodOrders with columns: id, restaurant, food_item, and order_date. Write a SQL query to list all unique restaurant names where you have placed orders, using the DISTINCT keyword.

Query / Answer:

```
select DISTINCT artist_name FROM musicplaylist
```

Image / Screenshot:

The screenshot shows a SQL query execution interface. At the top, the query `select DISTINCT artist_name FROM musicplaylist;` is displayed. Below the query, there are several interactive options: ☐ Profiling, [\[Edit inline \]](#), [\[Edit \]](#), [\[Explain SQL \]](#), [\[Create PHP code \]](#), and [\[Refresh \]](#). Below these options, there is a section for displaying results: ☐ Show all, Number of rows: 25 (with a dropdown arrow), and Filter rows: Search this (with a text input field). Below this section, there is a button labeled "Extra options". The results are displayed in a table with one column, "artist_name". The table contains five rows of data: Gulsan, Taylor Swift, atif, sunidhi, and lana del re. Each row has a checkbox, an "Edit" button (pencil icon), a "Copy" button (copy icon), and a "Delete" button (trash icon). At the bottom of the table, there is a "Check all" checkbox, a "With selected:" label, and buttons for "Edit", "Copy", and "Del" (trash icon).

	artist_name
☐	Gulsan
☐	Taylor Swift
☐	atif
☐	sunidhi
☐	lana del re

SESSION 4 - SELECT Statement Basics

Task 4: Write a SQL query on the FoodOrders table to select food_item as 'Dish' and order_date as 'Date Ordered', displaying only these two columns with the column aliases in the output.

Query / Answer:

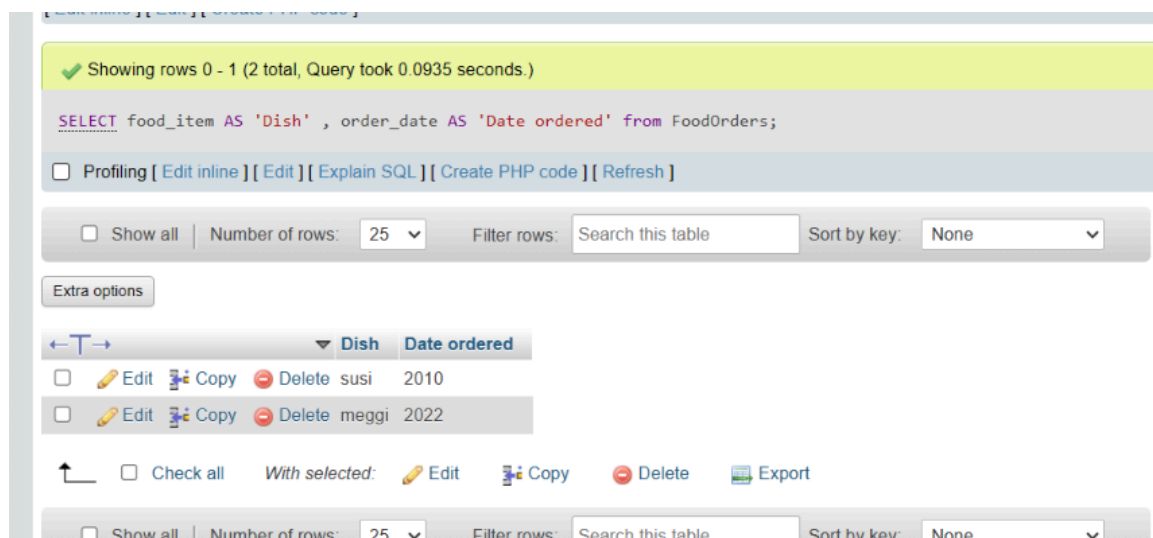

```
CREATE TABLE FoodOrders(
```

```
    id INT AUTO_INCREMENT PRIMARY KEY ,  
    restaurant varchar(50) not null,  
    food_item varchar(50) not null,  
    order_date varchar(50) not null
```

```
);
```

```
SELECT food_item AS 'Dish' , order_date AS 'Date ordered' from FoodOrders
```

Image / Screenshot:

SESSION 4 - SELECT Statement Basics

Task 5: You tried running this query: `SELECT DISTINCT food_item, restaurant FROM FoodOrders LIMIT 2`, but it returns an error or doesn't work as expected. Identify and fix the mistake in the query.

Hint: Check the correct placement and usage of the LIMIT keyword in SQL syntax.

Query / Answer:

No problem it ran successfully

No error in the query it was typo in questions

Image / Screenshot:

The screenshot shows a web-based SQL interface. At the top, there is a 'Hide query box' button. Below it, a green status bar indicates 'Showing rows 0 - 1 (2 total, Query took 0.0003 seconds.)'. The SQL query entered is `SELECT DISTINCT food_item , restaurant FROM foodOrders LIMIT 2;`. Below the query, there are links for 'Profiling', 'Edit inline', 'Edit', 'Explain SQL', 'Create PHP code', and 'Refresh'. An 'Extra options' button is also present. The query results are displayed in a table with two columns: 'food_item' and 'restaurant'. The results are:

	food_item	restaurant
☐	susi	Tam Jam
☐	meggi	Honest

Below the table, there are icons for 'Edit', 'Copy', and 'Delete' for each row. At the bottom, there is a 'Check all' checkbox, a 'With selected:' label, and icons for 'Edit', 'Copy', 'Delete', and 'Export'. A 'Query results operations' button is also visible.
